Summary

Highly accomplished Full Stack Developer with an impressive track record of driving success in startup environments. Throughout my career, I have consistently delivered exceptional results and contributed to significant achievements. At one notable company, the product I developed played a pivotal role in catapulting revenue growth by an astounding factor of ten. Moreover, I played a critical role as a key team member at another company, securing seed funding and receiving prestigious recognition as the industry leader.

With over four years of hands-on experience in Typescript, Javascript, React Native, Node.js, React, SQL, and NoSQL databases, I possess a meticulous attention to detail and an unwavering commitment to delivering unparalleled user experiences. I thrive in fast-paced, deadline-driven environments and have repeatedly demonstrated my ability to take ownership of projects, leading them to resounding success.

I am genuinely enthusiastic about embracing new challenges and leveraging my expertise to propel your organization to new heights. Together, we can achieve remarkable accomplishments and pave the way for your organization's future growth.

Experience

Software Developer (part time)
Tomation Solutions

Jan 2023 - Present (6 months)
- Reduced the estimated first release time by 2 months through my contributions to the integration of the first version of the application.
- Designed, documented and created the database architecture, enabling the team to build and maintain the database efficiently.
- Currently working on the integration of an app with over 25 screens, ensuring seamless functionality and exceptional user experience.

Software Engineer
Rico Africa

Jan 2022 - Dec 2022 (1 year)
- Spearheaded the development of the MVP, writing the initial line of code and documentation, resulting in the launch of the product 3 months ahead of schedule.
- Mentored and trained 5 junior developers, resulting in a highly skilled and productive team that was able to complete the project under budget and ahead of schedule.
- Implemented CI/CD pipelines, reducing the time to deploy code by 50%, improving the speed and efficiency of the development process and resulting in an increase in productivity by 40%.

Software Developer
Yoris Africa

May 2020 - Nov 2021 (1 year 7 months)

■ Redesigned the existing Web and mobile applications infrastructure, resulting in a 40% improving application performance and a 25% reduction in monthly AWS costs.
■ Led collaboration with the cybersecurity team to improve website security, resulting in a 60%decrease in the number of security incidents reported.
■ Established a culture of technical excellence within the team, resulting in the successful implementation of multiple technical projects and increased employee engagement. Within the first 4months, the team became more tech-oriented, resulting in a 25% increase in productivity and a 20%improvement in time efficiency.

Frontend Developer
Side Hustle
Feb 2019 - Apr 2020 (1 year 3 months)
■ Spearheaded the development and successful launch of the Web product, building the initial webapplication and internal infrastructure from scratch.
■ Developed a scalable website that facilitated over 1000 partners and 1000+ bookings per month.
■ Played a key role in the company's growth, contributing to the ownership of over 100 cars andfacilitating over 1000 monthly bookings through the website, which continues to use the foundation builtduring my tenure.

Education

Microverse
Microverse Software Development Program, Computer Software Engineering
Feb 2022 - Jan 2023
Mentored junior web developers, and providing technical support through code reviews
Utilized cross-browser and legacy-supported JavaScript, mobile first and responsive CSS, and semantic HTML
Coordinated with marketing team to provide tools that better support their efforts & simultaneously reduce developer reliance
